

Sofia Valadares Cavalcanti

Full Stack Developer | React & Spring Boot | REST APIs

+55 (81) 99914-9274 | sofia.v.cav@gmail.com | www.linkedin.com/in/sofia-v-cavalcanti | https://github.com/SofiaValadares | Brazil, Recife/PE

About Me

Full Stack Developer with experience building scalable applications using React, Angular, Java with Spring Boot, and Kotlin. I work on end-to-end solutions, covering front-end, back-end, REST APIs, data modeling, and system integration.

I have experience working in agile squads, participating in technical decision-making, collaborating with multidisciplinary teams, and developing MVPs focused on innovation. I aim to build solutions with high code quality, strong architectural organization, performance focus, and attention to user experience.

Education

Bachelor's Degree in Computer Science
CESAR School | August 2022 – November 2026

International Experience

International Academic Mobility — Porto, Portugal
Faculty of Engineering of the University of Porto (FEUP) | February 2024 – July 2024

Advanced English — Waterloo, Canada
Instituição | June 2023

Experience

CESAR — Center for Advanced Studies and Systems of Recife

Full Stack Development Intern
September 2024 – Present

Worked on software development in an agile environment, participating in squads and contributing to MVPs and scalable systems. Experience in full stack development using Angular, React, Java, Spring Boot, and Kotlin, focusing on front-end, back-end, and database integration. Developed web features, built and integrated REST APIs, supported data modeling and business logic implementation, and collaborated in code reviews and technical discussions.

Projects

Sentinel
API for wildfire risk analysis in the Caatinga biome, using real environmental data and REST services to generate insights. The project focuses on environmental and educational applications, transforming raw data into useful information for monitoring, research, and the development of preservation-focused solutions.
https://sentinela-frontend-seven.vercel.app/

PokeGuessTeam
Local Pokémon team guessing game using deduction logic based on visual clues per slot. The application supports matches with six-Pokémon teams, score tracking, progressive feedback, and multiplayer modes (local or against AI).

Technical Skills

Front-end: React, Angular, TypeScript, JavaScript, HTML, CSS
Back-end: Java, Spring Boot, Kotlin, Node.js
Mobile: Kotlin, Jetpack Compose
Database: PostgreSQL, SQLite, data modeling
APIs & Integrations: REST APIs, front-end/back-end integration, external service consumption
Tools: Git, GitHub, Docker, Postman, DBBeaver
Methodologies & Practices: Scrum, version control, code review, technical documentation

Languages

- Portuguese, Native
- English, Advanced

Certifications

Java Web: Build Applications Using Spring Boot
Alura, 2025
Training focused on web application development with Spring Boot, API creation, data persistence with Spring Data JPA, and best practices in the Java ecosystem.
Certidication: https://cursos.alura.com.br/degree/certificate/9feb617d-d6f3-4b28-bcae-fb3eab2ce2dd?lang=en

Evolve Android apps with Jetpack Compose: create screens and manage states
Alura, 2025
Development of modern interfaces with Jetpack Compose, use of Lazy Layouts, form building, and state management with ViewModel in Android applications.
Certidication: https://cursos.alura.com.br/degree/certificate/f9641ad5-79a6-47d9-9d73-d308f0251547?lang=en
